

LEGEND

COASTAL UPLAND VEGETATION - DOMINANT PLANT SPECIES LISTED BELOW

TREES

Pinus contorta (Shore Pine)
Pseudotsuga menziesii (Douglas Fir)

UNDERSTORY

Arctostaphylos columbiana (Hairy Manzanita)
Gaultheria shallon (Salal)
Myrica californica (Pacific Wax Myrtle)
Polystichum munitum (Sword Fern)
Rhododendron macrophyllum (Coastal Rhododendron)
Vaccinium ovatum (Evergreen Huckleberry)

WETLAND VEGETATION - DOMINANT PLANT SPECIES LISTED BELOW (DATA IS BASED ON WETLAND DELINEATION REPORT, OCTOBER 2007 BY ENVIRONMENTAL SOLUTIONS, LLC.)

TREES

Alnus rubra (Red Alder)
Malus fusca (Pacific Crab Apple)
Pinus contorta (Shore Pine)
Salix species (Willow)

UNDERSTORY

Carex obnupta (Slough Sedge)
Gaultheria shallon (Salal)
Myrica californica (Pacific Wax Myrtle)
Rhododendron neoglandulosum (Smooth Labrador-tea)
Rosa nutkana (Nutka Rose)
Spiraea douglasii (Douglas Spiraea)

NOTES:

1. COASTAL RHODODENDRONS ARE FOUND THROUGHOUT THE HIGHER AREAS OF THE SITE WITH DENSITIES RANGING FROM ZERO TO TEN PLANTS PER 1000 SQ. FEET. LOWER AREAS AND WETLANDS ARE MOSTLY DEVOID OF RHODODENDRONS.
2. LIMITS OF VEGETATION TO REMAIN ARE PENDING DEVELOPMENT OF ENGINEER'S GRADING PLAN.

EXISTING VEGETATION PLAN

SCALE: 1" = 50'-0"
