Memorandum

To: Florence City Council
From: Kelli Weese, City Recorder
Date: August 7, 2017

Florence Coast Guard City Celebration Helicopter Landing Approval August 16, 2017 at 10:30 a.m.

Background and Information

On August 16, 2017 the City of Florence and the Siuslaw River Coast Guard Station will be hosting a celebration in honor of the City of Florence being named a Coast Guard City. This celebration will include the hosting of various dignitaries from the Coast Guard ranks who will need rapid transportation to the event proceedings.

In planning for the event, the Coast Guard has requested to land a helicopter adjacent to the Florence Events Center at either the City's adjacent lot, or the private lot across Quince Street. The Coast Guard has indicated that the helicopter landing is important to not only the transportation logistics of the event, but also its the celebratory nature.

Florence City Code Title 6, Chapter 1 requires written permission from the City Council to land / take off a helicopter within Florence City limits. According to the code, the City Council must determine that applicable safety requirements have or will be met and that the landing will not be a nuisance to the neighborhood.

Staff is currently working with the Coast Guard to ensure safety considerations are met, including notification of the landing to our local emergency responders. In addition, staff will assist the Coast Guard in coordination of the City's nuisance policies by notifying adjacent residents and businesses of the landing / takeoff.

Staff requests the City Council consider the Coast Guard's request at the August 7th City Council meeting.

Alternatives

- Approve the helicopter landing request pending the determination that all safety considerations are met and that adjacent businesses and residents are notified.
- Do not approve the helicopter landing request

Recommendation - Approve the following motion:

I move to approve the helicopter landing request from the United States Coast Guard for the Coast Guard City celebration on August 16th, 2017, pending adequate coast guard helicopter safety checks and submittal of notices to local emergency responders and adjacent businesses and residents.
