10-17-1 GENERAL PURPOSE FOR OLD TOWN: The Old Town District is intended to provide an area for pedestrian oriented, mixed land uses. Areas A and B are located near or along the waterfront and comprise the historic old town with generally smaller scale structures than Area C. The Old Town District is also intended to encourage restoration, revitalization and preservation of the District.

The Old Town District includes areas which vary in character and development potential. Therefore, the permitted uses and development regulations have been separately defined for three sub-areas (Areas A, B, and C) making up the overall Old Town District in accordance with Figure 17.1. The purpose of these sub-areas is described in each subsection.

10-17-2 DEFINITIONS: As used in this Chapter, the following definitions apply, instead of, where applicable, and in addition to the general definitions in Chapter 2:

ACCESSORY BUILDING A building of secondary importance on a site, detached from the principal building. The accessory building must be (1) subordinate in size (area and height) to the principal building; (2) contribute to the comfort, convenience, or necessity of occupants of the principal building; and (3) located on the same lot as the principal building; (4) under the same ownership and control as the principal structure; (5) in compliance with all applicable zoning regulations including building setbacks; and (6) shall not be constructed or maintained prior to the construction of the principal use. (Building permits for an accessory structure may be obtained as part of or at the same time as a permit for the principal structure). Examples of accessory buildings include but are not limited to: garages, carports, decks, gazebos, storage sheds, play houses, patios, and terraces.

ACCESSORY USE A use or activity that is a subordinate part of a primary use and that is clearly incidental to a primary use on a site. It shall (1) be subordinate to and serve a primary use in function and time; (2) be subordinate in area, extent, or purpose to primary use; (3) contribute to the comfort, convenience, or necessity of those occupying, working at, or being served by the primary use; (4) be located on the same lot as the primary use; (5) be under the same ownership and control as the primary use; (6) comply with the use limitations applicable in the zoning district in which it is located; and (7) no accessory use shall be established prior to the primary use.

BUILDING HEIGHT The “building height” dimension is defined as the vertical distance from the average level of the undisturbed natural grade around the building’s outer foundation line to the highest point of the roof or the roof parapet, if present. If fill has been or will be added or removed in accordance with a City-approved grading plan (as for drainage, access, or compatibility with surrounding topography), the approved grade shall be used in lieu of the undisturbed natural grade. Stories located entirely below the average grade level or occupying no more than three feet above the average grade level are not counted. The dimensional limit is normally adequate to allow a pitched or gable roof style over the maximum allowed number of above-grade stories.

VISUAL AID Visualization aids may be of three general types:
Type I: “Story poles” with connecting ribbons that are physically erected on the site to accurately represent the full extent of the proposed structure. Accuracy of critical story pole dimensions shall be checked and certified by a licensed surveyor after erection. Type I aids shall be installed twenty (20) days before the public hearing and removed within twenty (20) days after the final land use decision.

Type II: Virtual computer images which depict the proposed structure and its relation to the surroundings. Such images shall be accurately scaled and shall portray detailed 3-D perspectives of the structure/surroundings in color from several critical viewpoints as may be administratively specified. When applicable, viewsheds to the Siuslaw River, the US 101 bridge, the Pacific Ocean, and/or sand dunes shall be included in the depictions. The source/creator of the depictions shall be subject to approval by the City and the accuracy and validity of the depictions shall be certified by the source. Type II aids shall be available to the City and the public twenty (20) days before the public hearing.

Such renderings shall be at least two feet (2') in the smaller dimension, shall be accurately scaled, and shall portray detailed 3-D perspectives of the structure/surroundings from several critical viewpoints as may be administratively specified. When applicable, viewsheds to the Siuslaw River, the US 101 bridge, the Pacific Ocean, and/or sand dunes shall be included in the depictions. The source/creator of the depictions shall be subject to approval by the City and the accuracy and validity of the depictions shall be certified by the source.
