

RE: Floating Restroom

Location #1 or #2 OK I do not want it located in front of our property

You would have less labor and clean up costs if it was connected to the docks and public sewer.

Less trash in the Restroom and Tanks.

People could call ahead for food and drinks and have them ready to pick up while they are using the Restrooms.

I believe the business owner's would appreciate the extra business.

If they don't come in while they are fishing they most likely head for home after loading up their boats.

Cushman area needs it more.

Don Saxon
