Fire-Resistant Plants for Home Landscapes. 2006. Pacific Northwest Extension Publication. Oregon State University.

* Plants generally do not obtain standard height and width in the Florence area due to the stress of weather, wind, and poor soils

** B/B is Balled and Burlapped

*** Low water requirements after established. All plants need some water in the summer in Florence due to the high winds and sandy soils

NOTES:

- 1: Trees not big enough to count toward required number
- 2: Trees & Shrubs good for tall hedges
3. Shrubs good for low hedges
4. Good for high Summer/Winter wind
