Subject: Planning Commission Hearing Comments for August 11, 2020

Dear Planning Commission:

Like we all know the City of Florence as spent at least 2.5 million dollars to make Hwy 101 more pleasant & beautiful ! We are so thankful for this. But how many years has this taken to get to this point ? And now when everything looks so fine we have before us an idea that has the potential to severely damage our city's current landscape. Don't we already have enough car washes on the Hwy 101 ? How many more Coffee Kiosk's does our town really need ? We reviewed your landscape plans, Floor Plans & Elevation and concluded that even though the Kiosk is in front, it will not be enough to hide the depressing look of the car wash. Furthermore, your choice of color palate: off-white, light & dark brown, light & dark gray, and black are upsetting, not beautiful, and NO FUN! In this pandemic which has closed so many small businesses & cute shops, we need colors to upgrade & uplift the image of Hwy 101 & Our Town. Thank-you for taking your time to review my letter & please consider the women's opinions in this town.

Respectfully Submitted,

Vesselka Martinez
